

Auto Verdi
Racing OIL PUMPS

PRODUCT SHEET 23

Pump Information

Auto Verdi is constantly developing new models to meet customer requests from all forms of motorsport. Everything is fabricated in-house using the highest level of precision machinery available. Winning performance for racing engines from 2 to 12 cylinders that have won championships in NASCAR, NHRA, IHRA, Trans Am, FIA and more throughout the years. Share the confidence of these engine builders and let Auto Verdi put you in the winners circle!

- Auto Verdi Thin is a performance pump when small outside dimensions and low weight is a major concern. The scavenge sections have a smaller diameter than all standard dry sump pumps and can be built in 3-6 stages.
- Auto Verdi sportsman pump. An economical alternative to our line of professional products but without giving up any of our race winning performance. Fewer standard scavenge section modules and standard anodizing on all surfaces reduces the price but not the quality.
